Field Description	Field Abbreviation	Field Length	Field Type	Field Version
UCAS Tariff for general purposes	**XTARIFF**	**4**	**Char**	**1.7.4**

VALID ENTRIES

A number between 0000 and 9998, or four underscores ('____'), or four dollar symbols ('$$$$') .

ADDITIONAL INFORMATION

This field calculates a UCAS tariff score that will apply to a sub-set of qualifications available electronically from UCAS, and also BTEC qualifications, Diploma in Foundation Studies (Art and Design), and Higher Sports Leader qualifications. A full list of qualifications included in this tariff calculation is included in Appendix 1. The Appendix will be updated every year as new qualifications are included in UCAS tariff, and it will also reflect any changes in tariff point scores.

Before the opening of each student collection, XTARIFF will be recalculated for existing instances to reflect the current position of the field (i.e. reflects current position, not position at admission).

Handling of historical and current data

Once a value for XTARIFF has been calculated (see technical specification below for details and handling of de-duplicating subjects, Advanced Extension awards and International Baccalaureate Diplomas and Certificates), it will be handled as follows:

1. HESA maintains a historical register of data for an instance, the HINEP_Register. The historical value for XTARIFF for an instance will be stored in the HINEP_Register, derived from the QualificationsOnEntry (QoE) data. QualificationsOnEntry are expected to be submitted, if available, when an instance is first submitted. Where a QoE is submitted in subsequent collections, resubmission is taken to be an error correction of the previously-supplied data, and the XTARIFF value from the most recent collection will be calculated and retained.
2. In the current collection, a value will be assigned for each instance (see technical specification below) of either a number between 0000 and 9998, or four underscores if no QoE entity exists, or four dollar symbols if a QoE entity exists and **all** qualifications within it do not attract tariff points.
3. The value from the current collection and the value on the HINEP_Register are compared. Where the current collection contains underscores (i.e. no QoE entity in current collection for an instance) and the previously-held value contains a numeric value between 0000 and 9998 or $$$$, the historical value is carried forward into the current collection.
4. Where the current collection contains four underscores (i.e. no QoE entity in current collection for an instance) and the HINEP_Register value is also four underscores, underscores are retained.
5. In all other circumstances, the current value is used, and overwrites the previous value on the HINEP_Register. So, a current numeric value will always overwrite a numeric value on the HINEP _Register, and a current numeric value will overwrite underscores on the HINEP_Register. For new instances the current value will be written to the HINEP_Register.
6. Note to developers: If a combination of QUALTYPE and QUALGRADE exist for QUALTYPES that are listed in Appendix 1 but QUALGRADE is not listed in Appendix 1 (e.g. as a result of validation switches) then assign zero points (i.e treat as a fail grade).

DEPENDENT FIELDS

none

TECHNICAL SPECIFICATION

1. Special handling for particular qualifications

1a. International Baccalaureate Diplomas and Certificates

From 2010/11, students that register for an International Baccalaureate Diploma (QUALTYPE IE) but do not successfully complete all elements can achieve tariff points from individual Certificates and Core performance (QUALTYPEs IB, IS and ID).

Students that register for individual International Baccalaureate Certificates (QUALTYPEs IB and IS), rather than the International Baccalaureate Diploma (QUALTYPE IE), will not collect tariff points from the International Baccalaureate Bonus points (core) (QUALTYPE ID).

If an International Baccalaureate Diploma (QUALTYPE IE) qualification exists with a QUALGRADE in the range 24-45 inclusive (i.e. sufficient to qualify for tariff points), then the associated tariff points are used.

If an International Baccalaureate Diploma (QUALTYPR IE) exists with a non-null QUALGRADE outside the range of 24-45 inclusive (i.e. does not attract tariff points for the diploma) then only the tariff points from the International Baccalaureate Certificate Higher Level (QUALTYPE IB), International Baccalaureate Certificate Standard Level (QUALTYPE IS) and the International Baccalaureate Bonus points (core) (QUALTYPE ID) are used.

If there are Certificate Higher Level (IB), Certificate Standard Level (IS) and Bonus (core) (ID) points **but no** Diploma (IE) (i.e. certificate components are present, but no diploma attempt) then only the certificate components (IB and IS) attract tariff (i.e. core points (ID) are not included for certificate only candidates). An IE is only considered to have been attempted if there is a non-null QUALGRADE associated with it.

1b. Diplomas

Diplomas can be Progression Diplomas or Advanced Diplomas. These will comprise of an Advanced Diploma (QUALTYPE PA) or Progression Diploma (PD), an Extended Project (QUALTYPE EP), and Principal Learning (QUALTYPE PR). Principal Learning (PR) or Extended Project (EP) will only attract tariff points when **not** accompanied by an Advanced or Progression Diploma with a non-null QUALGRADE.

1c. Financial Services (Diploma) and Financial Services (Certificate)

Where a Financial Services (Diploma) qualification (QUALTYPE FD) is present with a Financial Services (Certificate) qualification (QUALTYPE FS), only the points from the Certificate are counted. If either qualification is present without the other, points are taken as with any other tariffable qualification (see subsequent steps).

1d. Advanced Extension and A levels

Where an Advanced Extension award (QUALTYPE AE) and A level (QUALTYPE A) are awarded in the same subject, both qualifications will be included in the overall tariff score. For example, if a student has an Advanced Extension Distinction (40 points), A level grade E (40 points) and AS Level A in QUALSBJ M11, Mathematics (60 points), the total carried forward will be the 80 points from the A level and Advanced Extension award. Where an Advanced Extension award is present without an A level in the same subject, this has points allocated as with any other qualification. It will then be treated as any other qualification (see subsequent steps).

2. De-duplication on subject

In general, learning in a particular subject for level three qualifications is grouped together, and the maximum tariff score for a given subject contributes to XTARIFF. For example, if a student instance has an A level, an AS level, a Scottish Higher and a Scottish Advanced Higher for Mathematics (QUALSBJ M11) then the single qualification that generates the highest tariff score will contribute to XTARIFF. There is a single exception to this for Advanced Extension awards and A levels - as detailed in section 1d above.

3. Overview

Once all qualifications have been assigned a score, then the value for an instance is handled as follows:

3a. If an EntryProfile and QualificationsOnEntry entity are submitted with an instance, then the QualificationsOnEntry entity will be used to calculate XTARIFF. This field is four characters wide, so if appropriate will be left padded with zeroes.

3b. If an EntryProfile and QualificationsOnEntry entity are submitted with an instance but all qualifications and grades reported do not result in a tariff score (for example, a single unclassified A level) then 0000 is assigned for that instance.

3c. Where a QualificationsOnEntry entity exists and all qualifications are not tariff-bearing (i.e., there are no qualifications with a HESA tariff status of '1'), XTARIFF is set to '$$$$' (to allow the distinction between zero tariff score, and an entity not having a numeric tariff score as all qualifications are not eligible for tariff calculation).

3d. If an EntryProfile and QualificationsOnEntry entity are not submitted with an instance, then four underscores are assigned.

4. Calculation

The value for an instance is then compared with the value in the HINEP_REGISTER, and the current numeric value (if there is one) retained.

Step A
Combinations of QUALGRADE and QUALTYPE define the tariff points.

Strip out any hashes (#) from QUALGRADE (these do not affect the assignment of tariff points, so can be disregarded for the purposes of this field). For example, QUALGRADE A#B becomes AB, A#B# becomes AB.

Do not strip out asterisks (*) as these have a different tariff point score assigned than a non-asterisked QUALGRADE

Assign a value of tariff points for every combination of QUALTYPE and QUALGRADE (**see Appendix 1**).

If a QUALGRADE is null, assign zero points to that QUALTYPE and QUALGRADE combination.

Steps B to H are to be carried out at the instance level

Step B
For instances which have an International Baccalaureate Diploma attempt (QUALTYPE IE), check whether QUALGRADE is in the range 24-45 inclusive. If so, retain tariff points for QUALTYPE IE. Do not assign points for any other International Baccalaureate component (i.e. do not apply points for IB, IS, ID).

If Diploma attempt (QUALTYPE IE) is present but the associated QUALGRADE is not numeric, or is not null, or is numeric but outside of the range 24-45 inclusive, then calculate points for International Baccalaureate Certificate Higher Level (QUALTYPE IB), International Baccalaureate Certificate Standard Level (QUALTYPE IS) and International Baccalaureate Bonus points (core) (QUALTYPE ID).

If Diploma attempt (QUALTYPE IE) is not present, or is present but the associated QUALGRADE is null, calculate points for Certificate Higher Level (IB) and Certificate Standard Level (IS) only (i.e. do not include Bonus points (core) from ID) for each instance.

Step C
If an instance is awarded an Advanced Diploma (QUALTYPE PA) with a non-null QUALGRADE, calculate the PA tariff from Appendix 1. If this instance **also** has tariff points from Principal Learning (QUALTYPE PR) and/or Extended Project (QUALTYPE EP), retain **only** the tariff points from the PA (even if the PA tariff points is zero).

If an instance is awarded a Progression Diploma (QUALTYPE PD) with a non-null QUALGRADE, calculate the PD tariff points from Appendix 1. If this instance **also** has tariff points from an Advanced Diploma (QUALTYPE PA), Principal Learning (QUALTYPE PR) and/or Extended Project (QUALTYPE EP), retain **only** the tariff points from the PD and/or PA (even if the PD and/or PA tariff points are zero).

If an instance is awarded a Extended Project (QUALTYPE EP) and/or Principal Learning (QUALTYPE PR) **without** either an Advanced Diploma (QUALTYPE PA) with a non-null QUALGRADE, or a Progression Diploma (QUALTYPE PD) with a non-null QUALGRADE, calculate the points for the QUALTYPE EP and/or QUALTYPE PR from Appendix 1.

Step D
Where a Financial Services (Diploma) qualification (QUALTYPE FD) is present with a Financial Services (Certificate) qualification (QUALTYPE FS), retain only the points from the Certificate, even if the Certificate has zero points or the associated GUALGRADE is null.

Step E
Where both an A level (QUALTYPE A) and an Advanced Extension award (QUALTYPE AE) exist for the same QUALSBJ, then add the highest tariff score from QUALTYPE A and QUALTYPE AE for that QUALSBJ.

Step F
Where qualifications (including those specified in Steps B, C and D) have identical subjects (QUALSBJ codes), identify the qualification which results in the highest tariff score, and remove the lower tariff point qualifications scores from the calculation for this instance.

Step G
Add the de-duplicated tariff scores together for each instance.

Where the total is 9999 or greater, set to 9998. Note that an exception check will warn for all XTARIFF values greater than 1000.

Step H
Where the total is 0000, and **all** the qualifications for an instance are in the list of qualifications that do not attract tariff (see list at end of Appendix 1) then overwrite 0000 with $$$$.

APPENDIX 1

This table contains all known valid combinations of QUALTYPE and QUALGRADE for 2011/12. Qualifications for which a UCAS tariff is only valid from 2012 onwards are not covered in this appendix. For ease of use, the appendix has been split into sub-sections, grouping qualifications into those whose associated points will be included in the XTARIFF calculation, and those that will not be. Those that will not be included in the calculation are further split into those that have a known grade structure and those that do not, in order to further aid in validation. These three groups can be identified through the values in the 'HESA tariff status' column as follows:

1: Qualification included in the XTARIFF calculation
2: Qualification not included in the XTARIFF calculation, grade structure known (included for validation purposes only)
3: Qualification not included in the XTARIFF calculation, no confirmed grade structure (included for validation purposes only)

When the XTARIFF calculation is carried out, any combination of QUALTYPE and QUALGRADE not listed with a HESA tariff value of '1' below (including where QUALGRADE is null) should be assigned zero points.

Changed tariff point values for certain QUALTYPEs:
The value of the tariff points assigned to certain qualifications changed for 2010 entry onwards. XTARIFF will be calculated using these changed values for all historical data on the QualificationsOnEntry register, including those for 2009 entry and before. These qualifications are:

Scottish Advanced Highers (QUALTYPE AH)
Scottish Highers (QUALTYPE H)
International Baccalaureate Diploma (QUALTYPE IE)

UCAS tariff status
Included in the Appendix 1 is a column 'UCAS tariff status' which documents whether the qualifications in the table are included in the UCAS tariff. This status is to be updated **once annually**, based upon a comparison with the information published about tariff on the UCAS website at capture date (this date being that of the revision note). This column is included for validation purposes only, and has no impact on the calculation of XTARIFF. The values in the 'UCAS tariff status' column are as follows:

0: Qualification not included in the UCAS tariff
1: Qualification included in the UCAS tariff

Note for developers - the appendix table is available as a csv file for import in the root of the HESA internal cvs data-management/Derived-Fields folder, as tariff_appendix1.csv.

Please note: shaded values in table above indicate provisional values. UCAS have not yet set a tariff for these grades, and so interim values (of the highest confirmed value for this qualification) are used for the purposes of this field.

The following are in the UCAS tariff but are not available electronically and are not included in this field:
Advanced Placement Programme (US and Canada)

Revision 1.1.1 2011-03-15 (Created. Appendix 1 updated for new combinations of grades. Changes introduced to allow reporting of '$$$$' where QualificationsOnEntry entity exists but all qualifications contained are non-tariff-bearing. Also amended technical specification notes to allow for IB students who register for a diploma but do not complete all elements and can achieve tariff points for individual certificates and core requirement, and to account for Diploma tariff scores.)

Revision 1.2.1 2011-03-17 (Correction in Technical specification and Appendix of International Baccalaureate Diploma (QUALTYPE IE) Grade 26 to 304 points. Cambridge Pre-U Principal Subject (UC D1), Cambridge Pre-U Global Perspectives and Research (UG D1), Cambridge Pre-U Short Course (US D1), Cambridge Pre-U Short Course (US D2), which were previously Tariff Points 'TBC', have been assigned the points of the next highest QUALGRADE of the same QUALTYPE: Cambridge Pre-U Principal Subject (UC D1) 145; Pre-U Global Perspectives and Research (UG D1) 140; Pre-U Short Course (US D1) 60; Pre-U Short Course (US D2) 60.)

Revision 1.3.1 2011-03-18 (Added values to Appendix 1)

Revision 1.3.2 2011-04-01 (Added text clarification following Software development coding)

Revision 1.3.3 2011-05-27 (Added note for updating tariff table for Scottish Standard Grades)

Revision 1.4.1 2011-07-22 (Text clarifications, and inclusion of D3, FA, GN, HS, LD, MU, PE, UD in list of qualifications that will generate '$$$$' if only these qualifications are available for an instance)

Revision 1.5.1 2011-08-18 (Addition of BTEC National Diploma (qualtype B) qualgrades D*D*D*, D*D*D, D*DD and associated tariff points - max. of 360 points for 2010/11. Text clarification on treatment of International Baccalaureate for clarity)

Revision 1.6.1 2011-09-05 (Addition of Scottish Standard Grade (Qualtype SS) Qualgrade B1 and B2 for XTARIFF lookup purposes. Additional text added to explain that B1 and B2 are not valid entries for Qualtype SS. Band 1 and Band 2 are the schema valid entries)

Revision 1.6.2 2011-11-08 (Additional text added to Step A section clarifying how null QUALGRADES are dealt with. Minor spelling corrections to Step C section)

Revision 1.6.3 2011-11-14 (Revision of text in Section 1a and 1b clarifying how null QUALGRADES are dealt with. Steps B and C amended for consistency.)

Revision 1.7.0 2012-01-30 (Appendix 1 updated for new combinations of QUALTYPEs and QUALGRADEs made available by UCAS, and restructured. Amended technical specification notes to allow for Financial Services (Certificate) and Financial Services (Diploma) combinations).

Revision 1.7.1 2012-03-23 (Appendix 1 updated to include a column to identify qualifications included in the UCAS tariff, as of revision date, entitled 'UCAS tariff status' (previous column 1 label 'Tariff status' changed to 'HESA tariff status'). UCAS tariff status notes added above the appendix. No change to 1.7.0 function).

Revision 1.7.2 2012-04-05 (Appendix 1 updated to correct the placement of the 'CIE AO (Advanced Ordinary)' (QUALTYPE AO) that was included in HESA Tariff Status 1, instead of HESA Tariff Status 2. Correction of three grades for QUALTYPE 'ID' which were missing prefixes - 1, 2 and 3 become +1, +2 and +3. No change to 1.7.0 function).

Revision 1.7.3 2012-05-02 (Minor clarifications to aid understanding: Technical Specification section 2 amended to refer to section 1d 'above', section 3c amended to refer to HESA tariff status, additional text added to Step D to state that FS score is always taken in preference to FD when both are present, and additional text added to Step F to confirm this stage applies to Steps B, C and D. No change to 1.7.0 function).

Revision 1.7.4 2012-09-28 (QUALTYPEs E2, W2, W3 and W4 moved from HESA Tariff Status 1 to HESA Tariff Status 2, with associated points set to zero. Duplicated rows associated with QUALTYPE FY deleted from HESA Tariff Status 2. Appendix 1 supplementary file 'tariff_appendix1.csv' updated to match. No change to 1.7.0 function).
