ADDITIONAL INFORMATION

This field returns the first 2 characters of the externally coded field ZSIC2007, 'Standard Industrial Classification 2007 for the DLHE', with the exception of code 9999 (Not known) which will return '___' (2 underscores).

The derived field labels reflect the Standard Industrial Classification economic activities structure as summarised in the UK Standard Industrial Classification of Economic Activities 2007 (SIC 2007) (www.ons.gov.uk/ons/guide-method/classifications/current-standard-classifications/standard-industrial-classification/index.html).

TECHNICAL SPECIFICATION

(N.B. must be executed in top down order - so that code 9999 is derived to '___' (Not known) prior to any match for valid entry '99' (Activities of extraterritorial organisations and bodies) being derived)

ZSIC2007 (CHAR 5)	XSIC202
First 4 characters are 9999, or field is blank	___ (2 underscores)
If the first two characters match the XSIC202 valid entries listed above	Return the first two characters
Otherwise	Null

Where the two character value is not found in the list of valid entries for XSIC202 (or has not been derived to '___') return Null as XSIC202. This is an error, highlighting that a value in the ZSIC2007 field cannot be derived to a known output value. (This is designed so the derived function does not fail. Nulls are to be identified at impossible values testing to flag the issue to HESA's Data Management team).

Revision 2.1.4 2012-01-11 (Additional information: ONS Standard Industrial Classification link updated.)

Revision 2.2.1 2012-10-19 (Additional information: source of SIC data updated from the survey field SIC2007 to the externally coded field ZSIC2007. Removal of 'XXXX' from the technical specification as these are not likely to be returned in XSIC2007. Addition of a line to the technical specification, requiring the function to output null if the first two characters of the returned data do not match valid entries list.)

Revision 2.2.2 2012-12-12 (Minor clarifications to Technical specification, changing ZSIC2007 to CHAR 5 to reflect this externally coded field and clarification added as to why the function must be completed top down.)

Revision 2.3.1 2013-01-14 (Minor change to Technical specification, changing first row to 'first 4 characters 9999, blank' to ensure any 9999n codes delivered are derived to '___' not known and not to '99' Activities of extraterritorial organisations and bodies)
