ADDITIONAL INFORMATION

This derived field is created in both the Student record (Cyy051) and the AP student record (Cyy054). In the Student record it uses the data in Student.DISABLE; AP student uses StudentEquality.DISABLE.

This field groups together the two coding frames in use in Student.DISABLE in the Student record. AP student uses only one coding frame.

Coverage is not universal for the disability field in either record, as not all categories of students are required to return disability information. Such students derive to 'X', Not applicable.

Note that Student.DISABLE codes 02, 03, 04, 05, 06, 07, 10, 11, 97, 98 and 99 in the Student record can only be used where Instance.COMDATE is before 2010-08-01. Consequently, from 2010/11 this field will not derive new entrants in that record to valid entries L Information refused, N Information not sought or N Not known. (These valid entries will only apply to continuing students).
