ADDITIONAL INFORMATION

This field groups the output of derived field XMODE01 (in the Cyy051 Student record) or XMODE02 (in the Cyy054 AP student record) into a three-way marker. It is designed to be used in conjunction with the HE standard registration population (XPSR01), as it derives writing up, sabbatical, dormant and FE continuous delivery instances - where present - to 'Other'. In the AP student record only codes 1 and 2 can be derived from XMODE02.

Code 1 'Full-time' includes sandwich instances.
