TECHNICAL SPECIFICATION

In order to derive this field, the number of whole years between BIRTHDTE and 31 August Y1 must be known. This value is called DIFF. For example, Y1=2001 in the 2001-02 reporting period and is obtained by concatenating the first two digits from year in the system date with the first two digits of the collection's RECID.

Cyy051.Student.BIRTHDTE, Cyy054.Student.BIRTHDTE or Cyy025.Person.BIRTHDTE	**DIFF (internal value)**	**XAGEA01**
Cyy051 Student record: Null or 9999-12-31 (if validation is switched to allow legacy default codes through)		99
Cyy054 AP student record: Null		
Cyy025 Staff record: Null, or 9999-12-31 or 1901-01-01 (if validation is switched to allow legacy default codes through)		
Otherwise	>= 0 and < 99	DIFF
	>= 99	98
	< 0	00

(Note: Staff 9999-12-31 and 1901-01-01 are not recognised default BIRTHDTE codes for the Staff 2012/13 collection onwards. They have been retained in the Technical specification to derive to 99 'Unknown age' solely on the premise that if Business rule errors are switched to allow these legacy codes through, they will be correctly allocated to Unknown age, rather than 00 'Less than 1 year old' or 98 'Over 97 years old').
