ADDITIONAL INFORMATION

The allocation of an institution to a geographical region relates only to the administrative centre of that institution. There may be students registered at institutions who are studying in regions other than that of the administrative centre of the institution.

This field derives the Open University as an English institution. Although the Open University teaches throughout the UK, their administrative centre is located in England. (In HESA analyses the Open University is often displayed separately.)

The HESA Data Management STATIC_DATA.INSTHQPCLOOKUP lookup table is updated with the Office for National Statistics Postcode Directory (ONSPD) in May, August and November each year. However, HESA would not expect the Country of institution to be reported differently within a HESA reporting year. Consequently this specification is updated only once per reporting year with the ONS postcode load in August each year as yyAUG.

Analysis of country of institution for DLHE is carried out by linking to XINSTC01 in the Student record (yy051).

From 2010/11 the August ONSPD update is used to ensure that all postcodes valid in a reporting period can be validated during submission.

(Note to Developers: From 2010/11 the static data postcode lookup tables provided by Data Management are updated with the August ONSPD (in addition to the November and May postcodes used for early systems and full systems, until the August data becomes available).
