ADDITIONAL INFORMATION

The HESA staff contract session population is an indicator of those contracts that are active during the HESA reporting period.

Staff returned with a dormant mode of employment (Contract.MOEMP=6) are excluded from this population.

Atypical staff (Contract.TERMS=3) are included in this population.

The HESA staff contract session population is only used in analyses of staff full-time equivalents (FTE) cost centre activity - (XSAFPE01) on the Cyy025_CC (cost centre) table - or when summing full-time equivalents (Contract.CONFTE) from the Person.Contract entity.
