

Field Description	Field Abbreviation	Field Length	Field Type	Field Version
UCAS Tariff for general purposes	XTARIFF	4	Char	1.8.7

## VALID ENTRIES

A number between 0000 and 9998, or four underscores ('\_\_\_\_\_'), or four dollar symbols ('\$\$\$\$') .

## ADDITIONAL INFORMATION

This field calculates a UCAS tariff score that will apply to a sub-set of qualifications available electronically from UCAS, and also Diploma in Foundation Studies (Art and Design). A full list of qualifications included in this tariff calculation is included in Appendix 1. The Appendix will be updated every year as new qualifications are included in UCAS tariff, and it will also reflect any changes in tariff point scores.

Before the opening of each student collection, XTARIFF will be recalculated for existing instances to reflect the current position of the field (i.e. reflects current position, not position at admission).

### Handling of historical and current data

**Once a value for XTARIFF has been calculated (see technical specification below for details and handling of de-duplicating subjects, Advanced Extension awards and International Baccalaureate Diplomas and Certificates), it will be handled as follows:**

- 1 HESA maintains a historical register of data for an instance, the HINEP\_Register. The historical value for XTARIFF for an instance will be stored in the HINEP\_Register, derived from the QualificationsOnEntry (QoE) data. QualificationsOnEntry are expected to be submitted, if available, when an instance is first submitted. Where a QoE is submitted in subsequent collections, resubmission is taken to be an error correction of the previously-supplied data, and the XTARIFF value from the most recent collection will be calculated and retained.
- 2 In the current collection, a value will be assigned for each instance (see technical specification below) of either a number between 0000 and 9998, or four underscores if no QoE entity exists, or four dollar symbols if a QoE entity exists and **all** qualifications within it do not attract tariff points.
- 3 The value from the current collection and the value on the HINEP\_Register are compared. Where the current collection contains underscores (i.e. no QoE entity in current collection for an instance) and the previously-held value contains a numeric value between 0000 and 9998 or \$\$\$\$ , the historical value is carried forward into the current collection.
- 4 Where the current collection contains four underscores (i.e. no QoE entity in current collection for an instance) and the HINEP\_Register value is also four underscores, underscores are retained.
- 5 In all other circumstances, the current value is used, and overwrites the previous value on the HINEP\_Register. So, a current numeric value will always overwrite a numeric value on the HINEP\_Register, and a current numeric value will overwrite underscores on the HINEP\_Register. For new instances the current value will be written to the HINEP\_Register.
- 6 Note to developers: If a combination of QUALTYPE and QUALGRADE exist for QUALTYPES that are listed in Appendix 1 but QUALGRADE is not listed in Appendix 1 (e.g. as a result of validation switches) then assign zero points (i.e treat as a fail grade).

## DEPENDENT FIELDS

none

## TECHNICAL SPECIFICATION

## 1. Special handling for particular qualifications

### 1a. International Baccalaureate Diplomas and Certificates

From 2010/11, students that register for an International Baccalaureate Diploma (QUALTYPE IE) but do not successfully complete all elements can achieve tariff points from individual Certificates and Core performance (QUALTYPEs IB, IS and ID).

Students that register for individual International Baccalaureate Certificates (QUALTYPEs IB and IS), rather than the International Baccalaureate Diploma (QUALTYPE IE), will not collect tariff points from the International Baccalaureate Bonus points (core) (QUALTYPE ID).

If an International Baccalaureate Diploma (QUALTYPE IE) qualification exists with a QUALGRADE in the range 24-45 inclusive (i.e. sufficient to qualify for tariff points), then the associated tariff points are used.

If an International Baccalaureate Diploma (QUALTYPE IE) exists with a non-null QUALGRADE outside the range of 24-45 inclusive (i.e. does not attract tariff points for the diploma) then only the tariff points from the International Baccalaureate Certificate Higher Level (QUALTYPE IB), International Baccalaureate Certificate Standard Level (QUALTYPE IS) and the International Baccalaureate Bonus points (core) (QUALTYPE ID) are used.

If there are Certificate Higher Level (IB), Certificate Standard Level (IS) and Bonus (core) (ID) points **but no** Diploma (IE) (i.e. certificate components are present, but no diploma attempt) then only the certificate components (IB and IS) attract tariff (i.e. core points (ID) are not included for certificate only candidates). An IE is only considered to have been attempted if there is a non-null QUALGRADE associated with it.

### 1b. Diplomas

Diplomas can be Progression Diplomas or Advanced Diplomas. These will comprise of an Advanced Diploma (QUALTYPE PA) or Progression Diploma (PD), an Extended Project (QUALTYPE EP), and Principal Learning (QUALTYPE PR). Principal Learning (PR) or Extended Project (EP) will only attract tariff points when **not** accompanied by an Advanced or Progression Diploma with a non-null QUALGRADE.

### 1c. Financial Services (Diploma) and Financial Services (Certificate)

Where Financial Services (Diploma) qualifications (QUALTYPE FD) and Financial Services (Certificate) qualifications (QUALTYPE FS) are present, only the score from a single qualification with the highest point score, regardless of whether it is at Diploma or Certificate level, should be kept.

Rank any present Financial Services (Diploma) qualifications (QUALTYPE FD) and Financial Services (Certificate) qualifications (QUALTYPE FS) by the tariff point scores they attract. Take only the points from the QUALTYPE+QUALGRADE combination which attracts the highest point score and set the scores of the remainder to zero. Where one or more combinations score equally highest, keep the score from the qualification with the lowest QUALENTYKEY and set the remainder to zero.

### 1d. Advanced Extension and A levels

Where an Advanced Extension award (QUALTYPE AE) and A level (QUALTYPE A) are awarded in the same subject, both qualifications will be included in the overall tariff score. For example, if a student has an Advanced Extension Distinction (40 points), A level grade E (40 points) and AS Level A in QUALSBJ M11, Mathematics (60 points), the total carried forward will be the 80 points from the A level and Advanced Extension award. Where an Advanced Extension award is present without an A level in the same subject, this has points allocated as with any other qualification. It will then be treated as any other qualification (see subsequent steps).

### 1e. The OCR National Certificate, Diploma, and Extended Diploma

The OCR National Certificate, Diploma, and Extended Diploma are qualifications that exist within a hierarchy - the Diploma (QUALTYPE OT) builds upon the work of the Certificate (QUALTYPE O6), and the Extended Diploma (QUALTYPE OE) builds upon the work of the Diploma. Such qualifications, where sat in an identical subject, are normally accounted for through the de-duping process (Step G) in order not to assign points twice (or more) for the same work. The OCR QUALTYPEs, however, are unique in that the associated QUALSBJ codes differ across the qualifications for the same subject: eg, Media is QUALSBJ code M16 for the Certificate, M17 for the Diploma, and M18 for the Extended Diploma. The standard method of removing such qualifications using identical subject codes will not, therefore, remove the lower OCR qualification(s) that is/are already accounted for in the higher. To account for this, the lower qualification(s) need to be removed from the pot at this stage by comparing only the first character of the associated QUALSBJ (e.g., 'M'), prior to the standard de-duplication on the whole of the QUALSBJ

code in Section 2 below. Where there is more than one QUALTYPE O6, OT or OE with the same initial QUALSBJ letter that score equally highest tariff points within those QUALTYPEs, keep the score from the qualification with the lowest QUALENTTRYKEY only.

## 2. De-duplication on subject

In general, learning in a particular subject for level three qualifications is grouped together, and the maximum tariff score for a given subject contributes to XTARIFF. For example, if a student instance has an A level, an AS level, a Scottish Higher and a Scottish Advanced Higher for Mathematics (QUALSBJ M11) then the single qualification that generates the highest tariff score will contribute to XTARIFF. There is a single exception to this for Advanced Extension awards and A levels - as detailed in section 1d above.

## 3. Overview

Once all qualifications have been assigned a score, then the value for an instance is handled as follows:

3a. If an EntryProfile and QualificationsOnEntry entity are submitted with an instance, then the QualificationsOnEntry entity will be used to calculate XTARIFF. This field is four characters wide, so if appropriate will be left padded with zeroes.

3b. If an EntryProfile and QualificationsOnEntry entity are submitted with an instance but all qualifications and grades reported do not result in a tariff score (for example, a single unclassified A level) then 0000 is assigned for that instance.

3c. Where a QualificationsOnEntry entity exists and all qualifications are not tariff-bearing (i.e., there are no qualifications with a HESA tariff status of '1'), XTARIFF is set to '\$\$\$\$' (to allow the distinction between zero tariff score, and an entity not having a numeric tariff score as all qualifications are not eligible for tariff calculation).

3d. If an EntryProfile and QualificationsOnEntry entity are not submitted with an instance, then four underscores are assigned.

## 4. Calculation

The value for an instance is then compared with the value in the HINEP\_REGISTER, and the current numeric value (if there is one) retained.

### Step A

Combinations of QUALGRADE and QUALTYPE define the tariff points.

Strip out any hashes (#) from QUALGRADE (these do not affect the assignment of tariff points, so can be disregarded for the purposes of this field). For example, QUALGRADE A#B becomes AB, A#B# becomes AB.

Do not strip out asterisks (\*) as these have a different tariff point score assigned than a non-asterisked QUALGRADE

Assign a value of tariff points for every combination of QUALTYPE and QUALGRADE (see Appendix 1).

If a QUALGRADE is null, assign zero points to that QUALTYPE and QUALGRADE combination.

### Steps B to I are to be carried out at the instance level

#### Step B

For instances which have an International Baccalaureate Diploma attempt (QUALTYPE IE), check whether QUALGRADE is in the range 24-45 inclusive. If so, retain tariff points for QUALTYPE IE. Do not assign points for any other International Baccalaureate component (i.e. do not apply points for IB, IS, ID).

If Diploma attempt (QUALTYPE IE) is present but the associated QUALGRADE is not numeric, or is not null, or is numeric but outside of the range 24-45 inclusive, then calculate points for International Baccalaureate Certificate Higher Level (QUALTYPE IB), International Baccalaureate Certificate Standard Level (QUALTYPE IS) and International Baccalaureate Bonus points (core) (QUALTYPE ID).

If Diploma attempt (QUALTYPE IE) is not present, or is present but the associated QUALGRADE is null, calculate points for Certificate Higher Level (IB) and Certificate Standard Level (IS) only (i.e. do not include Bonus points (core) from ID) for each instance.

#### Step C

If an instance is awarded an Advanced Diploma (QUALTYPE PA) with a non-null QUALGRADE, calculate the PA tariff from Appendix 1. If this instance **also** has tariff points from Principal Learning (QUALTYPE PR) and/or Extended Project (QUALTYPE EP), retain **only** the tariff points from the PA (even if the PA tariff points is zero).

If an instance is awarded a Progression Diploma (QUALTYPE PD) with a non-null QUALGRADE, calculate the PD tariff points from Appendix 1. If this instance **also** has tariff points from an Advanced Diploma (QUALTYPE PA), Principal Learning (QUALTYPE PR) and/or Extended Project (QUALTYPE EP), retain **only** the tariff points from the PD and PA (even if the PD and/or PA tariff points are zero).

If an instance is awarded a Extended Project (QUALTYPE EP) and/or Principal Learning (QUALTYPE PR) **without** either an Advanced Diploma (QUALTYPE PA) with a non-null QUALGRADE, or a Progression Diploma (QUALTYPE PD) with a non-null QUALGRADE, calculate the points for the QUALTYPE EP and/or QUALTYPE PR from Appendix 1.

#### Step D

Where a Financial Services (Diploma) qualification (QUALTYPE FD) is present with a Financial Services (Certificate) qualification (QUALTYPE FS), retain only the points from the QUALTYPE+QUALGRADE combination which attracts the highest point score. Where one or more combinations score equally highest, keep the score from the qualification with the lowest QUALENTYKEY only.

#### Step E

Where both an A level (QUALTYPE A) and an Advanced Extension award (QUALTYPE AE) exist for the same QUALSBJ, then add the highest tariff score from QUALTYPE A and QUALTYPE AE for that QUALSBJ.

#### Step F

Where more than one qualification of O6, OT or OE exists and the associated QUALSBJs begin with the same letter, take only the tariff points for the qualification that attracts the highest number of points, even if the associated QUALGRADES are null, and disregard the remaining qualifications with that initial subject letter. Where there is more than one QUALTYPE O6, OT or OE with the same initial QUALSBJ letter that score equally highest tariff points within those QUALTYPEs, keep the score from the qualification with the lowest QUALENTYKEY only.

#### Step G

Where qualifications (including those specified in Steps B, C, D, E, and F) have identical subjects (QUALSBJ codes), identify the qualification which results in the highest tariff score, and remove the lower tariff point qualifications scores from the calculation for this instance.

#### Step H

Add the de-duplicated tariff scores together for each instance.

Where the total is 9999 or greater, set to 9998. Note that an exception check will warn for all XTARIFF values greater than 1000.

#### Step I

Where the total is 0000, and **all** the qualifications for an instance are in the list of qualifications that do not attract tariff (see list at end of Appendix 1) then overwrite 0000 with \$\$\$\$.

## APPENDIX 1

This table contains all known valid combinations of QUALTYPE and QUALGRADE for 2013/14. Qualifications for which a UCAS tariff is only valid after this point are not covered in this appendix. For ease of use, the appendix has been split into sub-sections, grouping qualifications into those whose associated points will be included in the XTARIFF calculation, and those that will not be. Those that will not be included in the calculation are further split into those that have a known grade structure and those that do not, in order to further aid in validation. These three groups can be identified through the values in the 'HESA tariff status' column as follows:

- 1: Qualification included in the XTARIFF calculation
- 2: Qualification not included in the XTARIFF calculation, grade structure known (included for validation purposes only)
- 3: Qualification not included in the XTARIFF calculation, no confirmed grade structure (included for validation purposes only)

**When the XTARIFF calculation is carried out, any combination of QUALTYPE and QUALGRADE not listed with a HESA tariff status value of '1' below (including where QUALGRADE is null) should be assigned zero points.**

### Changed tariff point values for certain QUALTYPES:

The value of the tariff points assigned to certain qualifications changed for 2010 entry onwards. XTARIFF will be calculated using these changed values for all historical data on the QualificationsOnEntry register, including those for 2009 entry and before. These qualifications are:

Scottish Advanced Highers (QUALTYPE AH)  
 Scottish Highers (QUALTYPE H)  
 International Baccalaureate Diploma (QUALTYPE IE)

### UCAS tariff status

Included in the Appendix 1 is a column 'UCAS tariff status' which documents whether the qualifications in the table are included in the UCAS tariff and are level 3 qualifications on the National Qualifications Framework. This status is to be updated **once annually**, based upon a comparison with the information published about tariff on the UCAS website at capture date (this date being that of the revision note). This column is included for validation purposes only, and has no impact on the calculation of XTARIFF. The values in the 'UCAS tariff status' column are as follows:

- 0: Qualification not included in the UCAS tariff at level 3 of the National Qualifications Framework
- 1: Qualification included in the UCAS tariff at level 3 of the National Qualifications Framework

**Note for developers** - the appendix table is available as a csv file for import in the root of the HESA internal cvs data-management/Derived-Fields folder, as tariff\_appendix1.csv.

**Please note: shaded values in table above indicate provisional values. UCAS have not yet set a tariff for these grades, and so interim values (of the highest confirmed value for this qualification) are used for the purposes of this field.**

The following are in the UCAS tariff but are not available electronically and are not included in this field:  
Advanced Placement Programme (US and Canada)

Revision 1.8.4 2013-09-26 (Appendix 1 updated to move the BTEC Lvl 3 Foundation Diploma 120 (QCF/FAD); BTEC Lvl 4 Foundation Diploma 120+ (QCF/FAD); and the BTEC Lvl 3 Foundation Diploma (NQF/FAD) (QUALTYPEs BI, BJ and BX respectively) from HESA and UCAS tariff statuses of 0 to 1, with tariff points assigned accordingly. These qualifications attract tariff points as the Diploma in Foundation Studies (Art & Design, and Art, Design & Media) qualification).

Revision 1.8.5 2013-10-15 (Technical specification calculation Step F and section 1e revised to state the requirement that where there is more than one qualification of QUALTYPE O6, OT or OE with the same initial QUALSBJ letter that score equally highest tariff points within those QUALTYPEs, only the one with the lowest QUAENTRYKEY should retain the points).

Revision 1.8.6 2014-01-14 (Appendix 1 updated for new combinations of QUALTYPEs and QUALGRADEs made available by UCAS for the 2013/14 academic year).

Revision 1.8.7 2014-09-12 (Appendix 1 updated to correct the HESA tariff status of the WJEC Level 3 Award, Certificate and Diploma (QUALTYPEs WA, WC and WD), which were incorrectly set as '1'. These have been corrected to '3').
