

Field Description	Field Abbreviation	Field Length	Field Type	Field Version
Sum of GROSSFEE values for the reporting period	XGROSSFEE01	7	CHAR	1.2.1

VALID ENTRIES

The format of XGROSSFEE01 is a number of up to seven digits, or seven underscores, '_____' which denotes 'Not applicable'.

ADDITIONAL INFORMATION

This field holds the summed value of all InstancePeriod.GROSSFEE values for an instance. It is designed to allow analysis of the sum of the gross fees charged for the entirety of the reporting period.

For instance periods which straddle a reporting year the full fee for the instance period is returned in the reporting year within which the instance period commences, ensuring that fees are not counted twice. Where it is not known which or how many modules the student will elect to take in the second element of the instance period, providers return the fee based on modules started in the reporting year.

DEPENDENT FIELDS

none

TECHNICAL SPECIFICATION

Link all InstancePeriods submitted using InstanceKEY. Sum the values of the GROSSFEE fields on all linked InstancePeriods.

Where the resulting value is null (because no value has been submitted in any InstancePeriod) return seven underscores '_____' to indicate a value is not applicable.

The format of GROSSFEE is up to six digits, with no decimal places. GROSSFEE is submitted in whole pounds.

Revision 1.1.1 2015-06-12 (Created for C14054)

Revision 1.2.1 2015-10-17 (Field format changed to CHAR, and additional valid entry specified to deal with scenarios when all associated GROSSFEE values are null.)
