

Field Description	Field Abbreviation	Field Length	Field Type	Field Version
Aggregate offshore region of provision	XREGAG01	4	Char	2.5.1

VALID ENTRIES

XL	Guernsey and Jersey
IM	Isle of Man
GREU	Geographic region - Other European Union
GRAF	Geographic region - Africa
GRAS	Geographic region - Asia
GRAU	Geographic region - Australasia
GRME	Geographic region - Middle East
GRNA	Geographic region - North America
GROE	Geographic region - Other Europe
GRSA	Geographic region - South America

ADDITIONAL INFORMATION

This field groups the country of provision entries from the Aggregate offshore collection (Cyy052) to regions in a manner consistent with the Student collection's domicile derived fields.

The valid entries for this field are created from an overseas lookup table, provided by Data Management, which includes all the valid country entries in the column F_DOMICILE_ISO. (The Aggregate offshore collection country entries are a subset of the Student collection DOMICILE entries.)

Entry XL is the National Statistics County Classification (NSCC) code for Channel Islands not otherwise specified, but is used in this field to label Guernsey and Jersey. Guernsey and Jersey in this context refer to the Bailiwicks of Guernsey and Jersey, which includes their smaller islands. Guernsey and Jersey includes Channel Islands not otherwise specified.

DEPENDENT FIELDS

none

TECHNICAL SPECIFICATION

The table T_OVERSEAS_LOOKUP_V9 consists of 3 columns:

Country of domicile (F_DOMICILE, VARCHAR2, 4); Region of domicile (F_REGION, VARCHAR2, 4) and ISO Country of domicile (F_DOMICILE_ISO, VARCHAR2, 2). This table has been supplied in an Oracle table provided by Data Management.

Where the COUNTRY value is found in the F_DOMICILE_ISO column of T_OVERSEAS_LOOKUP_V9, then return F_REGION as XREGAG01.

Where the COUNTRY is not found in the F_DOMICILE_ISO column of T_OVERSEAS_LOOKUP_V9, then return Null as XREGAG01, which will be reproduced in XREGAG01. This is an error, highlighting that a value in the collection's COUNTRY field is not contained in the F_DOMICILE_ISO column of T_OVERSEAS_LOOKUP_V9. (This is designed so the derived function does not fail. Nulls are to be identified at impossible values testing to flag the issue to HESA's Data Management team.)

Cyy052 Provision.COUNTRY (2 CHAR)	XREGAG01
Found in T_OVERSEAS_LOOKUP_V9. F_DOMICILE_ISO	T_OVERSEAS_LOOKUP_V9.F_REGION
Not found in T_OVERSEAS_LOOKUP_V9. F_DOMICILE_ISO	Null

Revision 2.5.1 2016-09-12 (Technical specification revised to update references to T_OVERSEAS_LOOKUP_V8, which has been replaced with T_OVERSEAS_LOOKUP_V9 to accomodate Mayotte joining the EU, and consequently deriving to GREU in F_REGION.)
