

Field Description	Field Abbreviation	Field Length	Field Type	Field Version
UCAS tariff point aggregation	XTPOINTS	4	Number	1.2.1

VALID ENTRIES

A number between 0 and 9998.

ADDITIONAL INFORMATION

This field calculates an aggregated score from a sub-set of qualifications, using a tariff point scoring system maintained by UCAS. A full list of qualifications included in this tariff calculation is included in Appendix 1. The Appendix will be updated every year as new qualifications are included in UCAS tariff, and it will also reflect any changes in tariff point scores.

The XTPOINTS field replaces the XTARIFF field, which was calculated on a different points system and using a different methodology. The two fields are not directly comparable, although both are designed to aggregate individual qualification scores for different subject content.

Before the opening of each student collection, XTPOINTS will be recalculated for existing instances to reflect the current specification of the field (i.e. the value for the instance will reflect the current definition, not the definition at the original point of submission).

Handling of historical and current data

HESA maintains a historical register of data for an instance, the Continuity_Register. A value for XTPOINTS for an instance will be stored in the Continuity_Register, derived from submitted QualificationsOnEntry (QoE) data. QualificationsOnEntry are expected to be provided, if available, when an instance is first submitted. Where a QoE is submitted in subsequent collections, resubmission is taken to be an error correction of the previously-supplied data, and the XTPOINTS value from the most recent collection will be calculated and retained.

DEPENDENT FIELDS

XTARIFFGP02

TECHNICAL SPECIFICATION

1. Calculation of XTPOINTS on both the incoming data and Continuity_Register

The following steps are run on both the Continuity_Register and incoming data, to set a XTPOINTS value on both.

Step A – Initial assignment of points

Combinations of QUALGRADE and QUALTYPE define the tariff points.

- Strip out any hashes (#) from QUALGRADE (these do not affect the assignment of tariff points, so can be disregarded for the purposes of this field). For example, QUALGRADE A#B becomes AB, A#B# becomes AB.
- Assign a value of tariff points for every combination of QUALTYPE and QUALGRADE (see Appendix 1).
- If a QUALGRADE is null, assign zero points to that QUALTYPE and QUALGRADE combination.

Step B – De-duplication

Where more than one QUALTYPE for an instance has identical subjects (QUALSBJ codes), identify the qualification and grade combination which results in the highest tariff score, and set the tariff point score(s) for any other combination(s) to zero. There is one exception to this: where both an A level (QUALTYPE A) and an Advanced Extension award (QUALTYPE AE) exist for the same QUALSBJ, retain the highest tariff scores of **both** the QUALTYPE A and QUALTYPE AE for that QUALSBJ – i.e., counteract the deduplication for these qualifications if they match subjects, retaining points for both. This is because we wish to retain the points from the Advanced Extension, as it is not considered that the content is duplicated in the A level.

Step C – Special treatment for Progression Diplomas

Progression Diplomas (QUALTYPE PD) are comprised of the content of an Extended Project (QUALTYPE EP) and Principal Learning (QUALTYPE PR) with additional teaching. If a PD qualification is submitted with a non-null QUALGRADE, set the tariff point score for any EP or PR qualifications for the instance to zero so as not to 'count' the same content twice.

Step D - Special treatment for Financial Services qualifications

Where there are multiple occurrences of either Financial Services (Diploma) qualifications (QUALTYPE FD) and/or Financial Services (Certificate) qualifications (QUALTYPE FS), retain only the points from the QUALTYPE+QUALGRADE combination which attracts the highest point score. Where one or more combinations score equally highest, keep the score from one qualification only; set the remaining matches to a tariff score of zero.

Step E - Special treatment for OCR National qualifications

Where more than one OCR National qualification (O6, OT or OE) exists and the associated QUALSBJs begin with the same letter, take only the tariff points for the qualification that attracts the highest number of points, even if the associated QUALGRADEs are null, and set the tariff score for the remaining qualifications with that initial subject letter to zero. Where there is more than one QUALTYPE O6, OT or OE with the same initial QUALSBJ letter that score equally highest tariff points within those QUALTYPEs, keep the score from the qualification with the lowest QALENTRYKEY only.

Step F - Aggregation

Add the tariff point scores together for each instance. Where the total is 9999 or greater, set XTPOINTS to 9998. Note that a data collection system check will warn for all XTPOINTS values greater than 1000.

2. Comparing calculations and setting a final value of XTPOINTS

Once all qualifications have been assigned a score, then the final value for an instance is handled as follows:

- The value from the current collection and the value on the Continuity_Register are compared.
- Where a current collection instance can be linked to a stored instance on the Continuity_Register and the current collection does not contain a QoE entity, the Continuity_Register value is carried forward into the current collection.
- Where a current collection instance can be linked to a stored instance on the Continuity_Register and the current collection does contain a QoE entity, the current collection value is used, and then overwrites the previous value on the Continuity_Register.

- In all other circumstances, the value calculated from the current collection is used. For new instances the current value will be written to the Continuity_Register.

APPENDIX 1

This table contains all known valid combinations of QUALTYPE and QUALGRADE for the reporting year, with the exception of three non-scoring grades which may apply across all qualifications:

Q = Query grade

X = Not taken, no show by candidate / declined grade

U = Unclassified

Qualifications for which a UCAS tariff is not yet applicable (i.e., because the qualification is new and is yet to be awarded) are not covered in this appendix.

Note for developers - the appendix table is available as a comma-separated file for import in the HESA derived fields .ZIP folder, as XTPOINTS_APPENDIX.csv.

HESA tariff status

For ease of use, the appendix has been split into sub-sections, grouping qualifications into those whose associated points will be included in the XTPOINTS calculation, and those that will not be. Those that will not be included in the calculation are further split into those that have a known grade structure and those that do not, in order to further aid in validation. These three groups can be identified through the values in the 'HESA tariff status' column as follows:

1: Qualification included in the XTPOINTS calculation

2: Qualification not included in the XTPOINTS calculation, grade structure known (included for validation purposes only)

3: Qualification not included in the XTPOINTS calculation, no confirmed grade structure (included for validation purposes only)

All combinations of QUALTYPE and QUALGRADE not listed with a HESA tariff status value of '1' below (including those not explicitly listed in the appendix) are assigned zero points.

UCAS tariff status

Included in Appendix 1 is a column 'UCAS tariff status' which documents whether the qualifications in the table are included in the UCAS tariff and are level 3 qualifications on the National Qualifications Framework. This status is updated once annually, based upon a comparison with the information published about tariff on the UCAS website at capture date (this date being that of the revision note). This column is included for validation purposes only, and has no impact on the calculation of XTPOINTS. The values in the 'UCAS tariff status' column are as follows:

1: Qualification included in the UCAS tariff at level 3 of the National Qualifications Framework

0: Qualification not included in the UCAS tariff at level 3 of the National Qualifications Framework
